PLANNING, Inc. Security Services

Introduction

PLANNING, Inc. is a small, minority and service-disabled veteran-owned training company offering specialized human resource solutions to the federal workforce. Since our founding in 1982, PLANNING, Inc. has developed a reputation for excellence as a provider of retirement and financial planning seminars. In 2009 we expanded our portfolio to include physical security systems and cyber-security training by building strategic alliances with organizations and independent contractors who are experts at delivering this type of instruction. In 2010, we moved further into the physical security services area by offering preventative, emergency and non-emergency maintenance services.

In 2011, PLANNING, Inc. was awarded our first security system contract. Services provided included both maintenance services and equipment realignment and installation. In 2012, we followed this success with a contract that asked for design, installation and maintenance of an integrated CCTV and Video Management System with an Intrusion Detection and Access Control System. Since then we have been awarded three additional Integrated Security Surveillance Systems (ACS, IDS, CCTV, VMS) contracts. Our success is the result of building solid teaming arrangements with highly-qualified companies that specialize in security systems maintenance, design, and installation. PLANNING, Inc. is the prime contractor for all of these contracts.

Services

Our team works with the public and private sector providing quality technical support and services that meet and exceed our clients' requirements in the maintenance and repairs of security systems. Our services are performed by expert technicians and include:

Ongoing service of the site's physical security program by providing –

- Hardware and Software Modifications and Maintenance
- Preventive Maintenance
 - Premium Software Support Agreement with Software Manufacturer
 - Cleaning, Adjustments, Services
 - Complete Review and Certification of the Correctness of Established Configuration Management Information
- Backup of Database on a Pre-determined Schedule
- Emergency Maintenance Service (available 24/7)
- Repairs, Realignments, and Installation (hardware/software)

Corporate Experience

Our experience spans several years and provides comprehensive security system design, installation, training, and support. Our expert staff and technical partners provide recommendations and solutions to our clients to ensure optimal performance of their individual security needs such as integrated ACS, IDS, and CCTV Security Surveillance Systems.
